INTRODUCTION

The Department of Advanced Education works with other government departments in an attempt to ensure that there are adequate numbers of appropriately trained persons to provide the health and social services required by the citizens of Alberta. An inter-departmental committee composed of representatives of the Departments of Advanced Education, Social Services and Community Health, and Hospitals and Medical Care is charged with coordinating efforts in this area. This Health and Social Services Disciplines Committee initiates the collection of information to provide an overview of the supply and demand for health and social service manpower. This information will aid post-secondary educational institutions, service agencies and government departments in making decisions pertaining to manpower planning in the health and social service fields.

The purpose of the inventory is to provide information on the output of health and social service training programs in the Province. The data, primarily on the number of enrollees and graduates, can be used in conjunction with information provided by the service sector to identify the demand which may be placed on the advanced education system in the future and assess the capability of the system to meet that demand. Additional information on manpower supply and demand is available in the Health and Social Services Disciplines Committee Annual Report.

This inventory is not intended to provide an explanation of the various health and social service programs. Calendars that provide detailed program descriptions can be obtained by contacting the registrar's office of appropriate vocational centre, college, technical institute or university.

The information in this inventory is for the 1979-80, 1980-81, 1981-82, 1982-83 and 1983-84 academic years and will continue to be updated on an annual basis.

Further information on the inventory can be obtained by contacting:

FORMAT OF INVENTORY

The information in this inventory is categorized according to health and social service discipline and is standardized to include the following information:

1. a list of training programs and institutions offering the programs;

2. data on the number of applicants, enrolments and graduates in the 1979-80, 1980-81, 1981-82, 1982-83 and 1983-84 academic years; length of programs; intake and graduation dates; and information on quotas; and

3. a comments section which describes the data.

Blanks are used when information is not applicable to a program. The most common example of this is found in programs which do not have part-time students. In these cases the PT columns on the tables will be blank. The tables differentiate between part-time and full-time students wherever possible. When this is not possible, a comment has been added.

The tables are structured, where possible, as follows:

Academic Year	1979-80		1980-81		1981-82		1982-83		1983-84	
Quota	20									
	FT	PT	FT	PT	FT	PT	FT	PT	FT	PT
Applicants	27									
Enrolments										
1st Year	20									
2nd Year			19							
Graduates			18							

If readers wish to determine the attrition from a particular class, they can follow the enrolments from the first year of a particular program through to graduation. For example, in the above table, the second year enrolments shown in the 1980-81 column of a two-year program represent the same class shown as first year enrolments in the 1979-80 column. The number of graduates from this two year program would be shown as graduates in 1980-81. The attrition over the two-year program was two students.

DATA COLLECTION AND DEFINITIONS

To collect the data presented in this inventory, the Health and Social Service Programs Branch of Advanced Education sent data requests to be completed by the head of each program. Program heads were sent forms which were used to present data on their program with the column for the most recent academic year left blank. They were asked to fill in the information and return the forms.

The terms "applicants", "enrolments", "graduates" and "academic year" were defined as follows:

1. applicants to the program were to be measured by the completed applications from which enrolment was chosen in that academic year.

2. annual enrolment was defined as the number of enrolments on the last possible date students were allowed to enrol in the first intake of the academic year, plus any new enrolments from subsequent intakes during the academic year.

3. graduates were defined as students who were awarded certificates, diplomas, or degrees.

4. academic year refers to September 1 of one year to August 31 of the following year (e.g. September 1, 1983 to August 31, 1984).

It is also important to note the following:

1. Quotas provided are occasionally exceeded as some attrition from a program may be anticipated or because of student transfers between programs. The quota refers to the optimal capacity of the program and is used as a general guideline for enrolment.

2. The deadline for accepting applications varies from program to program. Some program heads adhere to a strict deadline while others limit the number of applications they accept. Also, students often apply to more than one program in any given year. In some programs students apply directly to an affiliated health and social service agency.

3. Students are classified according to year depending upon the level of the majority of their courses. The number of students may increase from year to year due to students transferring into a program or repeating a year.

4. The comments provided at the end of each program summary qualify the data and should be reviewed when interpreting the information.

5. Provincial Summaries are provided on the blue pages when more than one training program is reported.

Response to the data request was excellent and follow-up telephone calls were made when required.

The following new programs have been added to the 1983-84 Inventory.

Program	Institution

COMBINED LABORATORY AND X-RAY TECHNOLOGY

TRAINING PROGRAM: Certificate in Combined Laboratory and X-Ray Technology

Institution: Northern Alberta Institute of Technology

Program Length: 1 Year

Intake Date: September

Graduation Dates: August and January

1984-85 Quota[1]: 20

ENROLMENT DATA[2]:

Academic Year	1979-80		1980-81		1981-82		1982-83		1983-84

Enrolments[3]										
First Year	36		33		28		29		36	1
Graduates	23		22		20		22		25	

COMMENTS:

1. The 1984-85 quota has been reduced due to a change in the program, whereby only one intake per year will be accepted.
2. Enrolments and graduates include both full-time and part-time students.
3. Students beginning the program in September are counted in the following academic year so that variations in starting and graduation dates do not create distortions when data is displayed on the basis of academic years.

COMMUNITY HEALTH

TRAINING PROGRAM: Community Health Worker Certificate[1]

Institution: Alberta Vocational Centre - Lac La Biche

Program Length: 36 weeks, or equivalent

Intake Date: October

Graduation Date: June

1984-85 Quota: 20

ENROLMENT DATA[2]:

Enrolments First Year	16	2	31		48		18	4	14	3
Graduates	9		18		40		14		12	2

COMMENTS:

1. The program intake is determined by direct federal grants.
2. During 1981-82, Lac La Biche ran two Community Health Worker programs. The same will be undertaken in the 1984-85 academic year.
3. No firm enrolment quota was implemented prior to 1980-81.
4. Since many prospective students apply directly to the Band Council rather than to A.V.C., the number of applicants is an estimate.

Graduates										
Certificates	15		3	1				2	20	15
Diplomas[3]			8		5		15	2		

COMMENTS:

1. The one-year certificate program is designed primarily for individuals already employed in the corrections field.
2. In 1982-83, only diploma level students were allowed to register, since the program was then under review. In subsequent years, only the certificate program has been offered.
3. Students who received diplomas did not, in most instances, previously receive a certificate.

CORRECTIONS (Continued)

Second Year	15		79		10		17		20	
Graduates										
Diplomas[3]	13		13		16		16		12	

COMMENTS:

1. In 1983-84 an additional 75 students were enrolled in the Correctional Officer's Certificate program, from which 17 students graduated.
2. The 1982-83 and 1983-84 quotas apply to the Justice Administration Department as well, thus causing the temporary increases in the respective quotas.
3. Of the 1981-82 and 1982-83 graduates, one received a certificate. Also, the number of graduates may exceed second year students due to the manner in which second year student status is calculated and yearly graduate statistics compiled.

Graduates[2]	60		21		1		8		85	

COMMENTS:

1. The 1984-85 quota includes 125 students per intake, thus equalling 250 in total. The marked increase in the 1984-85 quota is in response to demand which has been stimulated by a nation-wide advertising campaign.
2. Graduation dates are approximately 20 months after intake, depending upon the students' completion of course objectives. Hence students from the September 1980 intake graduate at the earliest in Spring 1982.

2. A number of students, though not registered in the program, have enrolled in some of the introductory courses offered. These students have not been included in the enrolment data.
3. Graduates include both full-time and part-time students.

COMMENTS:

1. Students with advanced credits can complete the program in 1 1/2 sessions. This means that they would complete the program in one calender year and would not be listed here as second year students. Therefore, more students would graduate than were enrolled in the second year.

COMMENTS:

1. Previous to the 1980-81 academic year there were two intakes in the program, one in September and one in March. Therefore, first year enrolments for 1980-81 also reflect students who enrolled in March 1980. These students proceeded into second year in March 1981.
2. The 1980-81 quota was set to accommodate curriculum revision which required extra faculty planning.
3. Part-time students enrolled in 1981-82 are registered in support courses only and not in nursing courses. These students will enrol in nursing courses in 1982-83.

COMMENTS:

1. The quota for the first course in the program is 100 and 50 for all courses thereafter.
2. The program is offered through Distance Delivery and is geared to part-time students. Those who wish may complete the program within one academic year, though few do. This accounts for the low number of graduates in comparison to enrolments.
3. Graduates include both full-time and part-time students in 1979-80.

NURSING (POST-BASIC CERTIFICATES) (Continued)

TRAINING PROGRAM: Mental Health Nursing

Institution: Mount Royal College

Program Length: 2 1/2 Years

Intake Date: September (Fall and Winter - Part-time)

Graduation Date: April

1984-85 Quota[1]:

ENROLMENT DATA[2]:

Academic Year	1979-80		1980-81		1981-82		1982-83		1983-84

Enrolments First Year			14		9	14	11	18	39	
Graduates			11		8		7		13	

COMMENTS:

1. The focus of the program is changing to part-time, distance delivery. The program quota on distance mode is 50.
2. As of the 1981-82 academic year, all figures have been adjusted to reflect definitions which are consistent with the College Student Records System and official institutional reporting.
   Also, full-time and part-time students are combined for 1983-84.
3. A policy of "unlimited enrolment" was instituted in 1983-84; therefore no quota was established for that academic year.

COMMENTS:

1. The quota and applicant figures refer to the on-campus program only. The quota has been reduced in 1984-85 graduates' recent inability to find employment. The program is to be offered on a trial basis for the next three years.
2. The enrolment and graduate data includes an off-campus program offered at Calgary.
3. Graduates include both full-time and part-time students. These may at times exceed enrolment figures, since part-time students enrolled in the off-campus program often require two years to graduate.

Graduates[3]	41		45		30		40		42	

COMMENTS:

1. Formerly called Bachelor of Occupational Therapy.
2. Students enrol in a pre-professional year and are admitted only to the second year of the Bachelor of Science in Occupational Therapy program. Also, a three-year diploma was awarded prior to 1979-80. Subsequently, many students who had received diplomas returned to upgrade their diploma to a degree. This accounts for the increase in the number of students from third to fourth year. These part-time students are included in the fourth year total in 1983-84.
3. Graduates include both full-time and part-time students.

Graduates	73		99		94		97		75	

COMMENTS:

1. The quota includes transfer students enrolling in the second year as well as first year students. Continuing second year students are not counted in the quota.
2. Transfer students who have credit for the first year courses can enter the program at the second year level. Enrolment figures are low in 1980-81 because more transfer students were admitted into second year in 1980-81.

Fourth Year	56		40	18	40	29	40	15	36	7
Graduates[2]	62		44	3	51		56		45	

COMMENTS:

1. The increase in the number of students from third to fourth year is because several students return each year to upgrade their diploma to a degree.
2. More students may graduate than are registered in fourth year because some students will complete the required physiotherapy courses at the University of Alberta and then leave to attend universities in other cities and their optional courses while working. Upon successful completion of these approved electives, the students are awarded a degree from the University of Alberta. Also, graduates include both full-time and part-time students.

COMMENTS:

1. This was previously recorded as the Youth Development Diploma program.
2. Part-time students are registered in both first and second year of the program. An increase in part-time enrolments in 1981-82 is due to the development of an outreach component to the program.
3. Graduates include both full-time and part-time students.

COMMENTS:

1. The Diploma program commenced in 1979-80. Therefore, there are no second year enrolments or graduates in that academic year. As of the 1981-82 reporting period, all figures have been adjusted to reflect official institutional definitions.
2. Figures for part-time enrolments include students in both their first and second year.
3. The number of graduates may exceed second year students due to the manner in which second year student status is calculated and yearly graduate statistics compiled.
